

Gunnison-Dolores Rivers Watershed

What is a Watershed? A watershed is the land that water flows across or under on its way to a stream, river, or lake. Everyone lives in a watershed. You and everyone in your watershed are part of the watershed community.

Colorado Watershed Approach: Instead of the traditional statewide approach in addressing priority resource issues like soil erosion, water quality, grazing lands, wildlife, and animal waste, NRCS looks to Colorado's ten watersheds to identify their particular local resource needs and priorities. Watershed work groups meet annually to determine which natural resource concerns are most prevalent in their communities. In turn, Colorado NRCS focuses its resources on addressing those concerns. Colorado's local conservation districts provide leadership in this effort to foster increased decision making at the local level.
